

Statistical

2010

Zea mays

When planning for a year, plant corn.

When planning for a decade, plant trees.

When planning for life, train and educate people.

Picking Corn

Corn (Zea mays)

Corn is the second largest field crop produced by San Joaquin County.

The fiber content in corn is seven times more than those in rice and wheat flour and helps the digestive system.

Summary of Statistical Data

This section of the Comprehensive Annual Financial Report provides additional historical perspective, context, and detail in order to provide a more comprehensive understanding of this year's financial statements, note disclosures, and supplementary information.

This section provides supplementary information according to Governmental Standards (GASB) Statement No. 44, which establishes and modifies required data by providing multi-year trend information to provide an understanding of how the organizations financial activities and positions have changed over time. GASB Statement No. 44 specifically addresses five objectives: Financial Trends; Revenue Capacity; Debt Capacity; Demographic and Economic Information; and Operating Information.

FINANCIAL TRENDS

Trend information is intended to assist users in understanding how the Plan's financial position has changed over time.

REVENUE CAPACITY

Revenue Capacity information is intended to assist users in understanding and assessing factors affecting a government's ability to generate its own revenue. The Plan is engaged only in fiduciary activities and thus is not required to present revenue capacity schedules. However, the *Schedule of Revenues by Source* is presented in order to provide users with current and historical information regarding member and employer contributions, as well as investment income.

DEBT CAPACITY

Debt Capacity Information is intended to assist users in understanding and assessing a government's debt burden and its ability to issue additional debt; however engaged in fiduciary duties only, the Plan has no long-term debt and therefore does not have debt capacity schedules to present.

DEMOGRAPHIC AND ECONOMIC INFORMATION

Demographic and Economic Information is intended to assist users in understanding the socioeconomic environment within which it operates and provide information that facilitates comparison of financial statement information over time. The *Schedule of Benefit Expenses by Type*; *Schedule of Retired Members by Type*; and *Schedule of Average Monthly Benefit Payments* as well as membership information presented in the *Schedule by Participating Employers* offer demographic and economic information to enhance understanding of the environment within which the System's financial activities take place.

OPERATING INFORMATION

Operating Information is intended to provide information about operations and resources to assist readers in using financial statement information to understand and assess a government's economic condition. The *Schedule of Revenues by Source* and *Schedule of Expenses by Type* provide historical information as to the Plan's additions by source, deductions by type, and total changes in net assets.

Schedule of Revenue By Source And Expenses By Type
